

Dental Care during the Pandemic

Our top priority is the health, safety, and well-being of our patients, staff, and communities. Oral health plays a major role in our overall well-being. Dental care is still important during the pandemic. Our team is committed to following all national and state guidelines.

Screening Requirements:

All patients and staff are screened for COVID symptoms, and exposure. We'll also check your temperature. If you are having symptoms, we ask that you call us to reschedule your appointment.

Aerosol management:

We've been thoughtful and intentional about minimizing aerosols by using alternative treatment methods when possible, creating isolation between rooms, and using additional vacuums with HEPA filters in each operatory.

What's Different?

- We use the CDC recommended PPE of N95 masks, protective eyewear, and lab coats. Our front office staff also wear masks and eye protection.
- You'll need to wear a face covering to your visit.
- We have limited seating in our lobby. Please come alone whenever possible.
- We are using more electronic paperwork.
- You'll be asked to wash your hands before and after your visit.
- We clean public areas every 2 hours.

We welcome your questions about our response to the COVID pandemic and your dental care.
